Get a success key for global markets

BizForest Business Solutions, Inc., is a premier multilingual translations and software localization company based in Tokyo, Japan and London, the United Kingdom.

The BizForest mission is to empower its international customers with affordable and powerful multilingual documentation solutions through the internet.

Since its inception in 1994, BizForest Business Solutions, Inc. has been building its unique know-hows to provide enhanced, high quality translations and digital documentation services, and pledges its energy and resources to lead the industry through the deep localization expertise and accumulated linguistic as well as technical knowledge.

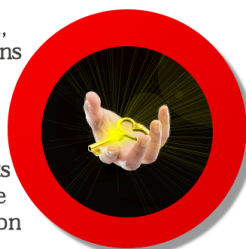

In the rapidly growing software and digital documentation industry with the recent wave of technological innovations, the company's history establishes BizForest.com as a reliable, professional localization partner for many businesses, both domestically and internationally.

What does BizForest mean?

"BizForest" is a combination of "Business" + "Forest". Forest provides boundless wealth; the stillness and soft air of an evening forest brings about peace of mind and serenity, while the crisp morning breeze refreshes and energizes us.

We, BizForest Business Solutions, Inc., hope to be a "Forest" that brings our customers wealth and peace.

Find your best solutions

Through our range of flexible and comprehensive services, we can create a globalization solution that will meet your greater business objectives both currently and in the future.

Each project is tailored to your specific marketing and business goals. Our network of resources is capable of providing complete, accurate and timely services everywhere in the world.

Backed by our diverse team of translation professionals who are industry-specific and culturally localized, our services encompass extensive areas: fields which require expertise such as law, finance and medical science, areas which call for the latest technological knowledge including computers, electrical engineering, electronics and mechanical engineering.

BizForest also handles DTP, electronic publishing and Web localization by leveraging the translation memory which can streamline the localization process for greater global Web business efficiencies and initiatives.

With our uncompromising business focus, BizForest can always deliver high-grade services to each specific project in most industry-standard formats.
